

Press Release

FOR IMMEDIATE RELEASE

Kerrville, TX – June 26, 2025 – Fox Tank Company, a premier API-12F and ASME-certified manufacturer of oil and water storage tanks, heater-treaters, gas separators, vapor recovery towers, and related equipment, today announced the successful expansion of its Kerrville, Texas, site. The expansion of the Kerrville site has already increased the productivity of the manufacturing.

Fox Tank Company has established itself as a leading provider of custom-engineered, API-certified equipment, with strategically located facilities in Kerrville, TX, Luling, TX, and Coshocton, OH. Over the past 50 years, the company has experienced significant growth in Kerrville, marked by the ramp-up of production capabilities through state-of-the-art fabrication plants. This expansion has not only enhanced their manufacturing prowess but also allowed for greater efficiency and quality in service delivery. The recent addition of a location in Coshocton, OH, has further bolstered Fox Tank Company's offerings by introducing in-house engineering and design services alongside their existing manufacturing capabilities and continued investments in quality and production equipment. This strategic growth positions the company to better meet the diverse needs of its clients while maintaining high standards of excellence in the industry.

"This consolidation marks a pivotal moment in our evolution," said Nathan Fox, CEO. "By expanding the Kerrville location, our fabrication capabilities have already seen an increase, and we reinforce our commitment to delivering premium quality and service with even greater efficiency and responsiveness."

Key Benefits of the Consolidation:

Enhanced Operational Efficiency – Streamlined workflows and centralized production reduce lead times and simplify logistics.

Scale & Capacity Growth – The Kerrville facility now houses more fabrication, welding, and assembly operations, bolstered by expanded crew sizes and upgraded resources.

Optimized Customer Service – Clients across the nation benefit from faster deliveries, coordinated quality control, and a unified point of contact.

Strategic Investment in Kerrville – The move reflects Fox Tank's commitment to a skilled workforce and manufacturing potential.

“Our Kerrville teams are energized by this consolidation,” continued Mr. Fox. “We are fully equipped to meet growing demand, whether it's standard API-12F tanks or advanced systems like high-pressure tanks and vapor recovery towers.”

Fox continued: “We’re proud of our legacy in Albany, but excited and confident this transition supports sustainable growth and superior service company-wide.”

Fox Tank Company’s reinforced all locations operation stands ready to serve existing and new customers with an unmatched combination of engineering excellence, manufacturing quality, and industry-leading turnaround times.

About Fox Tank Company

Fox Tank Company (<https://FoxTankCompany.com>) specializes in the design, fabrication, and delivery of API-12F certified oil and water storage tanks (ranging from 50 BBL to 1,000 BBL) and separation equipment, including heater-treaters, gas separators, free water knockouts, UL gasoline tanks, and vapor recovery towers. With facilities in Kerrville, Luling, and Coshocton (OH), Fox Tank continues it's commitment to the expanding market.
